

Shady Dog™ Dog Kennel Covers

Shady Dog™ is a high-density polyethylene, lock-stitched, knitted shade screen. These UV stabilized shade screens provide a 60% shade factor and will not rot or mildew.

Shady Dog™ cools your pet by blocking hot infrared sun rays and drawing cool air up from the ground to reduce temperatures by as much as 15°. This shade fabric can also be utilized as a wind or snow break during the winter months. The perimeter is double-stitched and solid brass grommets are placed every 24” for extra strength and durability. Includes 11” Dewitt Zip Ties.
